

Mint of the U. States at Philad<sup>a</sup>

Mt Refining Dept<sup>t</sup>

Phil<sup>a</sup> 23 Sept. 1879

Sir,

We have now been using Rowand's Charcoal Powder for casting Silver for some time, and I regret to say, that it is intolerably bad in lightness that the 6 barrels received from him on the 15<sup>th</sup> Sept. are nearly used up, so that we need to order another lot. Moreover their excessive lightness causes them to fly all over the melting rooms, and out into the area, and they are the chief cause of the dust & dirt to which we are liable. Of course all powdered charcoal will fly in use, but this very light coal flies about profusely. I saw some remarkably fine charcoal in the Agricult. Exhibition made by a Mathieu in Schuylkill<sup>Co.</sup> which pleased me by its remarkable density, & I urged the maker to send samples to the Mint with prices, which I trust & believe he will do.

Hon A Loudon Snowden }  
Superintendent }

Respectfully yours
